Education

Wethinkcode — Cape Town, South Africa
Higher Certificate information Technology Systems Development — *Completed – Dec 2024*

University Of The Western Cape — Cape Town, South Africa
Bachelor of law LLB — *Expected – May 2028*

Certifications

GenAI
Wethinkcode GenAi Certificate

Google Advanced Data Analytics Certificate
Google Advanced Data Analytics Certificate

Google Cybersecurity Certificate
Google Cybersecurity Certificate

Experience

Data analyst associate — present
CAPACITI — *Cape Town, South Africa*

- Collecting, Cleaning and validating structured and unstructured datasets using Pandas,NumPy,SQL and mathematical calculations to ensure normal data distribution. Conducting exploratory data analysis and applied statistical tests (hypothesis testing, confidence intervals) to identify trends and anomalies. Built interactive dashboards in Tableau and Power BI and python Plotly and Dash apps to visualise KPIs, reducing reporting time. Collaborating with cross functional teams to translate business requirement into actionable insights and automated recurring reports using python script.

Administrative Clerk — Dec 2019 – Oct 2020
Tshaka Scholar Transportation — *Cape Town, South Africa*

- Maintained detailed Excel-based spreadsheets to track vehicle performance, driver schedules, and route efficiency. Produced analytical reports highlighting trends Executed daily banking operations, including transaction verification and reconciliations, ensuring financial transparency and compliance.

Projects

LineOfThought |*RubyOnRails, PostgreSQL, Devise, Letter Opener, RSpec, Capybara, Guard, Faker, FactoryBot, YAML, Docke*

- Built a minimalist social media app where users can use their github account to sign up or sign up conventionally
- Allowed users to create group chats and send messages to the friends they are following or added. Have full control of their profile change their pictures online status.
- Deployed application to railway for the integrated database hosting and automatic HTTPS and custom domain.

Seoul Average Bike Rental | *R, Jupyter Notebook, public tableau*

- Conducted end-to-end analysis on over 200,000 bike-share trip records identify behavioral patterns between casual riders and annual members.
- Communicated the difference between member and casual subscriptions and peak periods for the casual bike renters.

uGrandjojo | *Microsoft, Open AI, Vs-code, TypeScript, CSS*

- Created a Vs-code extension in the Microsoft Ai for good 48 hour hackthon. The extension leverages chatgpt 3.5turbo to handle the sprite actions when a developer or student is being productive and uses code sense and chat function to help deal with impostor syndrome and they can choose a sprite persona help them, give feedback when the user requests.
- The extension is live in Vs-code market place the persona file checks for any harmful speech that user might be sharing with the ai agent and will connect to the Cape Mental Health for a professional and the chat will move over from ai to mental health professional. Code sense or code read is performed once the user agrees and it will assist them to the best of the agent ability. The sprite perform tricks if on idle.

Technical Skills

Soft Skills:Communication, collaboration, leadership, problem solving, adaptability, creativity, time management, emotional intelligence.
Programming Languages:Python, Java, Ruby, JavaScript, TypeScript, C sharp, React, C++, C, Rust.
Data analytics:PostgreSQL, MySQL, MongoDB, Plotly, Dash, Waffles, WordCloud, Pandas, NumPy, Matplotlib, Seaborn.
Platforms:Git, GitHub/GitLab, GitHub Actions Excel, PowerBi, Tableau, IBM Cognos, AWS, Microsoft Azure, Docker, Linux.
Testing:RSpec, Capybara, FactoryBot, Junit, Mockito, Jest, Selenium, Pytest, Unittest, react developer tool.
DevOps/Build:Maven, Gradle, Git, Github Actions, Docker, Kubernetes, AWS, Azure.
Libraries:Django, Flask, Spring Boot, Ruby on Rails, Thymeleaf, JWT, OAuth2.
